

# Pack & Seal Putty FR - Fire Retardant

## DESCRIPTION

Sylmasta Pack & Seal FR is a fire-retardant, non-setting sealant putty for packing out electrical and cable boxes to prevent the ingress of moisture, sealing around cable runs, blocking holes and making gaskets for extremely uneven faces. Pack & Seal will seal cable holes through walls, metal and most substrates.

Pack & Seal will not set and is easily removed if required. Pack & Seal also seals around all types of pipework and is used for gasketing between uneven surfaces.

Pack & Seal FR is bright red and easily visible to indicate where it has been used.

## Applications

- Packing out junction boxes against moisture & dust
- Forming removable cable glands
- Forming removable seal around cable and pipe runs
- Filling holes against water ingress
- Making gaskets on uneven surfaces

## TECHNICAL DATA

Colour . . . . . Red

Appearance. . . . . Putty

Standard Temperature Range. . . -55°C to 170°C
